Why This Guide Exists

Building a product is exciting, but turning your startup idea into a working product can feel overwhelming. You might be stuck between DIY attempts and overpriced agencies. That's where we come in.

At Dice Solutions, we help founders go from idea to launch in just 4 weeks—without burning cash or compromising on quality.

Who We Are

Built by Founders, for Founders

We're ex-startup engineers not just coders, who know what truly works (and what doesn't) when building digital products. From in-house tools to SaaS like Monitorly, we've built, shipped, and scaled it all.

Our mindset is simple:

- Move fast, but build with intent
- Avoid bloated code and endless meetings
- Deliver value early and often

We created Dice Solutions to bring this energy to other founders who want to move fast, validate ideas, and scale confidently.

The MVP Problem

Most MVPs fail, they're slow, expensive, overbuilt, and lack real user feedback. Founders end up spending months and lakhs without validation. At Dice Solutions, we flip that. Our lean, focused MVPs launch in just weeks, helping you test fast, spend smart, and build what your users actually need.

Our 4-Week MVP Framework:

WEEK 1
Discovery & Planning

WEEK 3
Integration & Testing

WEEK 2
Design & Core Build

WEEK 4
Launch & Feedback Loop

Real Tools. Real Tech. Real Fast.

Every project is different. We choose the best tools based on your goals — whether it's Jamstack, monolith, microservices, or serverless.

Plans & Pricing

Kickstart **INR 39,000**

UI mockups, technical
feasibility, roadmap

Startup MVP **INR 99,000**

Complete frontend +
backend, auth, admin,
integrations

Pro Scale **INR 1,49,000**

Scalable architecture,
CI/CD, custom APIs, AI
features

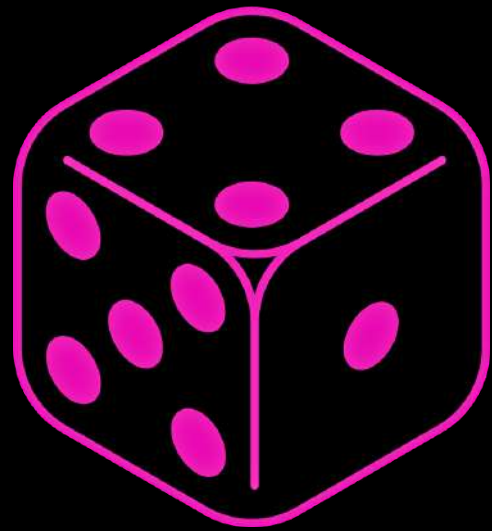

Let's Build Together

You've got the idea. We've got the team to bring it to life.

Whether you're a solo founder, startup team, or growing business, we're here to help you ship smarter—not slower.
